<input type="checkbox"/> Contract Renewal	New Contract Amount	Variable
<input type="checkbox"/> Recurring Contract	Previous Contract Amount	N/A
<input checked="" type="checkbox"/> New Contract	Variance	N/A

PRICE INCREASE / DECREASE EXPLANATION: N/A

DISCUSSION:

Retention ponds existing on BPS property are essential for proper site drainage. Retention ponds in Florida are prone for vegetative growth along shorelines and in the water. The Florida St. Johns Water Management District requires owner/operators of storm water management systems (including retention ponds & associated intake & outfall, etc.) to control excessive vegetation that negatively influences the performance of storm water control systems. Use of selective herbicides are the most practical and cost effective means of maintaining vegetative growth in/around retention ponds. The application (placement) of aquatic herbicides is regulated by Federal EPA and the Florida Division of Agriculture and Community Affairs. The above named vendor is qualified (licensed & experienced to apply aquatic herbicide) and the most cost effective response to this procurement solicitation.

The standard Invitation to Bid template has been used, which does not require legal review.

CONTRACT TERM:

The initial contract term shall commence October 7, 2020 and continue until October 6, 2023, with an option to renew for one (1) additional two (2) year period.

RECOMMENDATION:

It is the recommendation of Susan Hann, Assistant Superintendent of Facilities Services and Jim Powers, Manager of Environmental Health & Safety to approve the attached tabulation sheet with the vendor listed above at a variable award amount.

AUTHORITY FOR ACTION:

Florida Administrative Code 6A-1.012
