Would this redistricting affect the school where we are zoned? My son starts kindergarten next year. I would be very disappointed to have lived here for a couple years just to be redistricted right before he is set to start kindergarten, and there is no way we can afford to move in this market. I would really appreciate any insight you can provide, thank you!

Teachers being able to go to some activities more than once a week - The amount of children at Meadowlane is quite concerning especially when they are given the same amount of teachers as schools with way less numbers. There should also be an assistant in that media center. You're doing a huge disservice to students by not giving a School with that population another media specialist or a dedicated assistant.
