

HUNCH Design and Prototype Final Review Itinerary

Tentative

NASA Johnson Space Center, Houston

April 14, 2022

- 9:00 -9:30 HUNCH Mentors arrive for table clothes, displays, electrical outlets
- 9:30 - 10:00 Teachers drive through JSC front gate in first parking lot to drop off students and projects. Teachers then drive to Space Center Houston to park cars and ride the tram back to Saturn V Rocket building.
Students enter Saturn V Rocket building to set up projects.
Projects will be grouped together to make it easier for engineers to find the projects they are associated with. Share project documents with HUNCH in zip file Teachers pick up team packets
- 10:00 -11:00 Welcome to Final Review 2019. Introductions & opening announcements.
This is now a collaboration.
- 11:00-1:30 NASA Engineers and astronauts arrive to review student projects
Look nice, be calm, be concise and to the point
- 1:30 - 2:30 End of review
Begin taking down projects, folding table clothes, collecting displays
Drivers ride back to Space Center Houston on the tram for cars and return to parking lot to load up projects.
