

together that is Bayside and Southwest. They are within 4 miles of each other, why should they be in separate districts? As well as Sunrise. You have that one Elementary school is District 5 but right in the area that service that school in District 3. That seems crazy. Also, you really need to build another middle school. With so many houses and apartments coming to District 3 area, south of Sunrise, you really need to build another one.

- There doesn't seem to be much reason to change the boundaries from where they currently are. This seems like an attempt to break up one district that generally votes democrat (gerrymandering), and will make it more difficult for the board members to reach all areas of their districts, will divide their attention, and is a waste of district and taxpayer money.
- "We purchased a house in Viera High School district for that specific reason. My daughter will be a junior during 2023-2024.
- Why in the world would you want to completely disrupt the high school students?
- Viera will inevitably require another high school due the enormous growth and home construction going on. Why not look at building another high school rather than bus all these kids to satellite beach? "
- I do not support this plan because it does not show the benefits for our families and students. There are much instabilities at BPS and this change will create more. All students matter and please focus on proficiency levels!
- Leave Indialantic alone and get rid of Jennifer Jenkins asap!!
- I am firmly against this change, the current school board member lines group together nearer-by schools and are far more cohesive, while adopting the county commissioner lines would create far more arbitrary districts with schools that wouldn't make sense to lump together.
- What is the rational? How does this better serve every student with excellence?
- Vote No, I do not want the school board to adopt the new county commission district boundaries. I don't see how this is anything but politically motivated.
